With over three decades of Marlborough winemaking experience, the three Giesen brothers have come to know the region intimately, its best vineyards and its terroir. In 2008 they challenged our winemaking and viticulture teams to craft a collection of wines true to their vineyard, which spoke of their special place. Our Single Vineyard Selection was born in 2011. They are our icon wines, the best of the best. The journey of each wine starts in a Marlborough vineyard selected for its unique terroir and climate. They are then nurtured with meticulous hands-on viticulture to ensure fruit produces highly concentrated flavour. Our winemaking expertise then allows these wines to speak for themselves, their purity becoming a showcase of the land. We are proud to share our Single Vineyard Selection with you.

SINGLE VINEYARD SELECTION

PINOT NOIR 2015

CLAYVIN

VITICULTURE REGION	Marlborough's Wairau Valley - Southern Valley's sub region - New Zealand
VINEYARD HISTORY	Clayvin Vineyard, planted 1993, North facing, it was Marlborough's first significant hillside vineyard. The Clayvin Vineyard is organically farmed, high density planted using the competition between vines to reduce vigour, promoting root structure and delivering highly concentrated fruit. Initially taking a long term lease, seeing the potential the Giesen brothers purchased the vineyard outright in 2015.
SIZE	Full vineyard site 13.4 Ha
PRUNING	Two canes, low fruiting wire
SOIL STRUCTURE	Located on the undulating north facing slopes of the Brancott Valley, Clayvin Vineyard takes its unique name from the clay based soil profile that lies beneath the vineyard. They are fragile soils, with a complex clay profile which varies across the vineyard. The soils have good water retention, and fractured enough to allow the vines roots system to migrate deep into the cooler subsoil's allowing the vines to become more self sufficient.
VINTAGE REPORT	The 2015 harvest was typified by a hot, dry Indian Summer. Early frosts naturally fruit thinned the vines, but did not majorly damage much of the future leaf and canopy architecture. Water shortages meant the canopy had low vigor and the vines deep roots held a little advantage over other blocks. The warm days meant the picking could be completed early, to retain the acids, while not becoming overripe. The fruit was picked on flavour and tannin structure from the berry.
WINEMAKING HARVEST	16th of March to the 1st of April. Handpicked from the B, C, D F and G Blocks.
FERMENTATION	Minimal cold soak, with a 5 to 10 day ferment. The post-ferment maceration was up to 10 days so as not to extract hard, big tannins. 100% wild ferment.
PRESSING MATUATION	Basket pressed, Matured in 100% French Oak 300L Hogsheads with 27% new oak.
DECANTER	Recommended
BREATH	6 Hours
SERVING TEMPERATURE	17 degrees (winter months to 19 degrees)
WINE ANALYSIS	Alcohol: 12.73% TA: 5.99g/L pH: 3.51
AGING POTENTIAL	10 years
